

You Want What You Don't Have

SETUP: You have 4 memorized cards face down in the card box in this order from top to bottom: King, Queen, Joker, 2.

Spectator shuffles.	<i>Is there a boy or a girl?</i>	There is a <u>boy</u> .
	<i>What is his name?</i>	His name is <u>Mike</u> .
Put all the cards into the card box.	<i>Where does he live?</i>	He lives in a <u>mansion</u> .
	<i>What does the boy like?</i>	He likes <u>dogs</u> .
	<i>What does he have?</i>	He has one <u>dog</u> .
	<i>What does he want?</i>	He wants <u>another dog</u> .
	<i>What type of dog does he want?</i>	He wants a <u>10-legged dog</u> . There is a problem. The boy wants a 10-legged dog, but he doesn't have one.
Take cards out and cut cards, but do not complete the cut. Use the top cards to represent the transportation.	<i>Where does he go to get a dog?</i>	He goes to <u>Honolulu</u> .
	<i>How does he get there?</i>	He goes on his <u>camel</u> .
Use bottom cut cards to make 3 piles and leave the last card face down in its own pile.		He goes to 3 different places.
	Wait until you've said that he talks to a man, then flip over the top card from the pile furthest from the sole card.	<i>Who does Mike go to in Honolulu?</i>
	<i>Does Bob have a dog?</i>	Bob does <u>not</u> have a dog.
	<i>Does Bob give Mike a dog?</i>	Bob doesn't give him a dog.

Use the same top cards to represent the transportation.

Now where does Mike go to get a dog? He goes to Pirate Bay.

How does he get there?

He swims.

Wait until you've said that he talks to a woman, then flip over the top card from the next pile furthest from the sole card.

Who does Mike go to in Pirate Bay?

He goes to a woman named Mary.

Does Mary have a dog?

Mary does have a dog.

Does Mary give Mike a dog?

Mary does not give him a dog, because she doesn't have an extra 10-legged dog.

Use the same top cards to represent the transportation.

Now where does Mike go to get a dog? He goes to Planet X.

How does he get there?

He jumps.

Wait until you've said that he talks to a funny guy, then flip over the top card from the last multi-card pile.

Who does Mike go to on Planet X? He goes to a funny guy.

Does the funny guy have a dog? He does have a dog.

Does the funny guy give Mike a dog?

He does give Mike a dog, because he has lots of 10-legged dogs.

Wait until you've said the number, then flip over the card that is separate from the other 3 multi-card piles.

Now, how many dogs total does Mike have?

Now, Mike has 2 dogs.

Alternative Story Ideas:

Different 3 locations, different 3 visited people, and different desired thing (e.g. girlfriend and use the Queen as the last card) or different desired talent (e.g. wants to be able to eat 10 hotdogs in a minute and have the 10 card as the last card OR wants to be funny and save the ioker as the last card).
